## Q3 2023 INVESTOR REPORT

October, 2023

# Summary

We're incredibly pleased with successful new partnerships formed in the last several months, putting SLAM and Panda.co more and more on the radar, providing our partner's communities with our verifiably fair games of chance. As a result we have seen a notable uptick in ecosystem profits as a result, and we are thrilled to continue to consistently distribute shares of ecosystem dividends to our faithful holders.

As has been noted in previous reports, there are fewer updates to announce in the quarterly updates each time as we successfully make progress with maintaining and gradually evolving our ecosystem. As a result of this, we will from here on be condensing our quarterly updates into bi-yearly reports, with the next one planned for June 2024. We will be continuing our cadence of smaller weekly updates via SLAM Sunday, as we have been for the last 2.5 years - an accomplishment in and of itself that we are very proud of.

As the market seems to be shifting towards the end of the bear with the Bitcoin halving just around the corner, we are pleased that our ongoing product development of Panda.co has further and better positioned us to take full advantage as global interest in Crypto and onboard both players and investors alike when the bull market begins anew.

# Slam Vegas

SLAM Vegas has continued to be a tentpole of the SLAM operation delivering many customers a fun and seamless experience.

As our product development has been focused on Panda.co, we are now pleased to note the next step in SLAM Vegas's journey as it moves to its new home, integrated directly into Panda.co itself. This is a move we've had in mind for a long time, moving further toward our goal of consolidating our player experience into one single place. The strategy of this move is twofold, as this means we will be better positioned to offer seamless SLAM Vegas integration to our current and future whitelabel partners.

It is truly becoming a one-stop-shop for verifiably fair crypto gaming. We can't wait to share this next version of Panda.co with our community, our partners, and the world.
