NFT RADAR APP

NFT RADAR is a mobile application designed by the SLAM team for NFT enthusiasts as well as the whole crypto community. Its purpose is to provide a tool for people to easily track their NFT & Crypto portfolio.

It was been launched in the beginning of November 21' with a number of features including:

- Portfolio (NFT & Crypto combined. Easy conversion to USD, EUR, BTC, ETH)
- Stats (24h / 7d / All Time)
- Free-to-enter weekly giveaways
- Rarity & Traits

NFT Radar is free to download for all. We will monetise the app by placing advertisement space for NFT Collections and Tokens to promote their projects. The assets tab will be the main spot to advertise, next to highlighted projects and SLAM products. Thousands of NFT Radar users will be made aware of what SLAM and its product ecosystem is all about, providing great exposure.

WRAPPED SLAM

We have announced our intention to launch a wrapped version of SLAM on the ETH blockchain. A Q4 launch is planned, with an estimated launch date of late December 21'. Here is a few updates on the planning & progress:

- There will not be another presale for Wrapped SLAM on ETH.
- Buy/Sell taxes will not be the same as our BSC Contract. We will make it easier to buy/sell on ETH with lowered taxes.
- Supply will be 30 BILLION Wrapped SLAM. The same amount of SLAM will be burned/forever locked on BSC to sustain the original supply figures.
- Initial liquidity (ETH & SLAM) will be provided by the SLAM team.
- 5B SLAM will be locked forever in an NFT form to be sold on Opensea

After the launch on the ETH blockchain we will eventually bring SLAM to Polygon, Solana and Cardano. More details on these plans will be shared in the future.

JOKERS BY SLAM

One of our most ambitious projects will be Jokers By SLAM. Originally called it Slam Jokers, we are changing the name to further leverage the universal reputation of Jokers which transcends language, and is understood by non-English speakers as well. It will be clearer for people who have never heard about SLAM and come across Jokers. Jokers will be easier to own in terms of social media engagement and relevancy. Here is the latest news about Jokers by SLAM:

- Only 7777 pieces will ever be minted.
- Mint price will be 0.07 ETH for each piece.
- \$1,000,000 buyback fund will be created for SLAM from the public sale.
- We will receive a 5% royalty fee from every sale of Jokers. 35% of this royalty fee will go to Slam Pools.
- SLAM Billionaires will get one free Jokers NFT. A snapshot of holders will be taken mid December.
- Jokers owners will earn free \$SLAM on either a daily or a weekly basis as passive income. This structure will be announced closer to launch date.

Marketing will be heavily done through our NFT Radar App to thousands of new investors. Jokers will also have its own Twitter for us to promote it separately from the SLAM Ecosystem. More details will follow.

1ST SNEAK PEEK 🙄🙄

Here is the very first sneak peek of Jokers by SLAM (DRAFT). A team of 4 experienced designers are hard at work creating Jokers. Get ready to be puzzled! 🧩

SLAM CRASH V3

SLAM Crash is the 1st product that we launched. Six months after its inception, crash is continuing to grow at an insane pace in every single area including registered users, wagered amount and total profit. We are expecting to release Crash v3 during November with a lot of new cool features such as:

- Daily Bonus Rounds where players get back their original bets after the round ends.
- New deposit/withdrawal mechanism. Newly created wallets for each player for faster cashier transactions.
- 5 new partner tokens.
- USDT, DOGE, BTC, SOL payment methods addition.
- Affiliate
- Auto-Bet
- Charity
- Tip
- More engaging
- Dynamic bankroll investment

SLAM ROYALE

SLAM Royale is currently under maintenance to address bugs and implement overall improvements of the platform. After our initial launch we have had more than 500 players signing up for Royale. The total wagered amount has exceeded 2,566 BNB (\$1,700,000) with only a handful of players. We also held our 1st tournament with 72 players and concluded successfully. Once we relaunch Royale we will have regular tournaments on top of a lot of new ways to engage with players and have fun. We expect to relaunch Royale before December. Here is a few updates the new Royale will have:

- USDT gameplay only. We will still allow BNB deposits and also we will add ETH, BTC, DOGE deposits/withdrawals.
- Weekly tournaments. Every week there will also be a free-to-enter table where we will attract new players.
- Owning a Jokers by SLAM NFT piece will be the only way to showcase an avatar on Slam Royale.
- 35% of the profit will continue to be sent to Slam Pools.

Grand Opening on 2nd of January 2022!

SLAM STAKING

We are launching SLAM Staking in November 21'. It is the first ever staking program SLAM has offered. It will be evolved as it progresses but the foundation relies on providing SLAM holders an opportunity to earn further rewards on their SLAM holdings. It also helps the ecosystem by essentially removing a certain percentage from the circulating supply for a period of time.

Compared to industry giants like the Binance Earn program, SLAM Staking program offers competitive yield returns with multiple options to choose from. There are limits and rules in place to protect the program and the ecosystem. FAQ's can be found under slamtoken.com/staking

TOKEN	DURATION	EST. APY	PROGRAM LIMITS	LIMIT PER WALLET
SLAM	60 DAYS	4%	NO LIMIT	NO LIMIT
SLAM	90 DAYS	6.75%	MAX. 25B SLAM	1B SLAM
SLAM	180 DAYS	8%	MAX. 15B SLAM	250M SLAM

SLAM DAO (Decentralized Autonomous Organization)

The true meaning of the word 'Decentralization' is the transfer of control of an activity or organization to several authorities rather than a single entity. Over usage of the word may have caused people to dismiss its true meaning and how it can shape the future of blockchain as well as our world altogether.

With that in mind we are launching SLAM DAO to involve our holders in the important decision making process of our project. From now on, major decisions will be asked through DAO and every SLAM holder will get a chance to make their voice heard.

How it works:

- Go to <https://snapshot.org/#/slamtoken.eth>
- See proposals prepared by the SLAM Team on the home page
- Connect your wallet via MetaMask or WalletConnect
- Vote on proposals. Your vote will be weighted with the amount of SLAM that you hold. Holding more SLAM means that you will have more voting power than others.
- After you and others vote we will have a clearer picture of the direction our community is asking us to take. You decide!

We are working on an innovative way for people who stake their SLAM to still be able to vote on proposals. More details to come.
