POKER

A flock of starlings is captured in flight against a blurred background of blue and green. The birds are in various stages of wing movement, creating a sense of dynamic motion. The central bird is in sharp focus, showing its iridescent blue and black feathers and its wings spread wide. Other birds are visible in the foreground and background, some slightly out of focus, emphasizing the collective movement of the flock.

SLAM 2.0

MIGRATION

'WE ALWAYS MOVE AS ONE'

SLAM has successfully migrated to a brand new contract on April 26th, 2022 the day when the original v1 liquidity pool has unlocked after 1 year of its inception. Migration was needed for a number of reasons;

- 10% transaction fees on all buys/sells were not sustainable and attractive to new investors. Since contract's ownership was renounced we weren't able to adjust fees in any way.
- Due to Pancakeswap's migration to a v2 contract of their own and liquidity pool structure, we weren't able to merge our 2 liquidity pools(our initial LP was locked until April 26th, 2022 as well). This caused bots to be able easily arbitrage trade on both of our LPs front-running our investors.
- SLAM v1 BNB LP was too sizable for any price movements even after a momentum rally so we wanted to keep it under a certain level until we are big enough to be able to move it up further. SLAM team is never driven by the price of SLAM but we value and believe in our market it's important to catch momentum and rally our community around it.
- We weren't able to improve our contract to align with our ever-growing ecosystem since we renounced the ownership of the contract.

Here is what's new with the SLAM 2.0 contract and tokenomics;

- SLAM 2.0 contract was released to the community prior to official migration for feedbacks.
- We have lowered the transaction fees **from 10% to 4% on all buys/sells.**
- 2% is allocated for our marketing/operations wallet while each remaining 1% goes to a newly created buyback wallet and our only LP on Pancakeswap v2.
- We have created the new LP with a **800 BNB** and SLAM 2.0 and locked it for a year on Dxsale.
- We have set aside **1280 BNB** to create a buyback wallet where all the SLAM that will be bought will be locked until **January 1st, 2100** technically making us a deflationary token where the supply is exponentially bought and locked.
- Lastly, we have decided to lower the team-controlled SLAM assets and instantly locked(not burned) **43% of the whole supply until January 1st, 2100** to demonstrate our dedication to SLAM and our beloved community.

SLAM has built an ecosystem that not only sustains itself even during a bear market with profits generated by its products, but an ecosystem that now works as a flywheel with the new buyback mechanism, gradually planned supply shock and tokenomics that directly benefits the community...

WELCOME

SLAM VEGAS

2.0

'GETS BETTER EVERYDAY'

Idea of building a full crypto casino was something we had in mind since we launched SLAM last year. But our community inspired us to come up with the name 'Slam Vegas' as you can see below. Our community is not just a diamond-handed bunch but a creative group of people that push us forward with their critical thinking and out of the box suggestions. We are lucky to be able to build Slam Vegas with them.

4:35 AM

Slam Vegas had been redesigned twice until now. We are trying to improve the functionalities of the platform as well as the user experience and interface. As we are slowly marketing Vegas, we have struck a deal with an expert group of designers who has experience building online casinos. They have already made incredible progress and we are extremely happy with working with them so far. Today we will introduce you the whole new Slam Vegas 2.0 makeover...

Slam Vegas has always been the end goal of what we wanted to achieve. Seeing it come to life and improving every single day now shows us that it can actually become a much bigger platform than we have imagined. Slow and steady wins the race and that's our motto. Took months to build Slam Vegas but we did it. Took months to acquire our license but we did it. And now we are ready for the next challenge of making Slam Vegas one of the top crypto casinos out there.

Might take months but we will do it.

Slam Pools Total Revenue Breakdown

Here are list of things we have prioritized when it comes to Slam Vegas roadmap and strategy:

- Continuation of the Slam Vegas marketing,
 - New streamer deals
 - Ads on crypto faucet platforms(best performing referral sites of crypto casinos)
 - Revamping our affiliate program
 - Announcing the Slam Vegas bonus structure(deposits, CPAs etc.)
 - Hiring a dedicated Slam Vegas marketing employee
 - Locking deals with major affiliate players from iGaming communities to multiply our traffic
 - Attending Sigma iGaming Summit in Belgrade, Serbia in August as SLAM team

SIGMA
BALKANS & CIS
22-25 AUGUST 2022
BELGRADE, SERBIA

OUR ATTENDEES

- Whole new look for Slam Vegas with a major UI/UX update
- Adding more providers and more games. We are hoping to add EGT as a provider very soon(one of the top slots physical and online slots provider)
- Eventually adding a live support system onto our platform on top of the support ticket system that's already have been implemented
- Adding BTC, XRP, ADA, SOL, DOGE and SHIBA support.
- Surpassing **\$10,000,000** in wagered USD amount & **\$50,000** in monthly net profits before Q3 ends.

Also one big surprise at the end of the presentation...

SLAM

STAKING 2.0

'IT ADDS UP'

After the migration we have increased the new staking program allocation of SLAM up to **485K SLAM**. With the initial staking program we have announced, more than 30% of the whole supply was staked. We have great experience and learnings from the last staking initiative. So we have been working on a new model that works for all of our holders. Introducing Slam Staking 2.0 🙌

TOKEN	DURATION	EST. APY	PROGRAM LIMITS	LIMIT PER WALLET
SLAM	60 DAYS	%5	NO LIMIT	NO LIMIT
SLAM	120 DAYS	%7,25	NO LIMIT	NO LIMIT

Slam Staking 2.0 offers returns above the industry average with no limits provides every one of our holders an equal chance of participating to our staking program. If you believe in the future of SLAM and our team, then our staking program is a great opportunity to multiply your investment by absolutely doing nothing while STILL receiving your payouts on a regular basis. We will merge Slam Pools with Slam Staking soon to be able to easily track qualifications to receive a payout.

Staking will now be done via smart contract that will automatically receive SLAM and distribute rewards when it's time. If holders would like to un stake before the staking period ends, they will need to request via Slam Pools. After the request contract will automatically send back the staked tokens WITH NO REWARDS in exactly 48 hours.

DO IT

1622

Jokers have been the most visually creative project of the SLAM team by far. We are proud of them and will continue to work on Jokers until they get their deserved recognition in the NFT space. Since the launch exactly **1636 Jokers** have been minted on ETH and BSC. Original supply was 8,888 Jokers. Jokers were designed to be truly dynamic NFTs that you can customize. And Joker Royale was planned to be a decentralized gambling platform.

We had to rethink all of these ambitious goals of ours once we saw Opensea delisting all the major gambling related NFTs such as Sloties, Gambling Apes etc. and Twitter is also suspending these and similar projects accounts with no warning. NFT space seems to be leaning towards zero tolerance of gambling related products at this moment. With our ambitious goal to revive the Jokers minting as well as complying with these platforms to avoid any trouble, today we are announcing some major changes to Jokers by SLAM dNFTs:

- We are completely restructuring Jokers strategy and roadmap to have zero affiliation to gambling whatsoever.
- We will be cutting supply at **4,444 NFTs** with an innovative twist. All Joker owners will be able to pick between their own Joker NFT that they already minted or the mirrored-numbered one in the remaining mysterious 4,444 Jokers. If they choose the latter, metadata will be updated and Joker will switch to the new one. This way we are cutting supply at half while still being able to preserve 1/1s or rare Jokers that would have been minted in the remaining 4,444 batch of Jokers.
- We are changing our collection name into '**Poker.Faces**'
- We are turning our existing poker platform Slam Royale into a new, improved, NFT community focused poker platform under '**PokerFaces.co**'. Play money only so everyone will be able to play anytime they'd like completely free.
- There will be weekly tournaments and free rolls for everyone to join and win prizes. We will aim to be the hub for NFT space's Poker platform for fun, charities and competitions.
- Joker owners will have free entries to these tournaments and dynamic ranking competitions as the platform improves.
- We will eventually offer in-platform purchases where the proceeds will be used for Poker Faces only.
- More updates will be provided in the upcoming days on our discord channel.

***SLAM IS PLANNING TO BUILD THE WORLD'S 1ST
PHYSICAL CRASH SLOT MACHINE 🎰***

We are in talks with a major physical casino chain in Europe to build and legally operate the 1st crash slot machine. Stay tuned for more details..

THANK YOU
